

Fujian Suntion

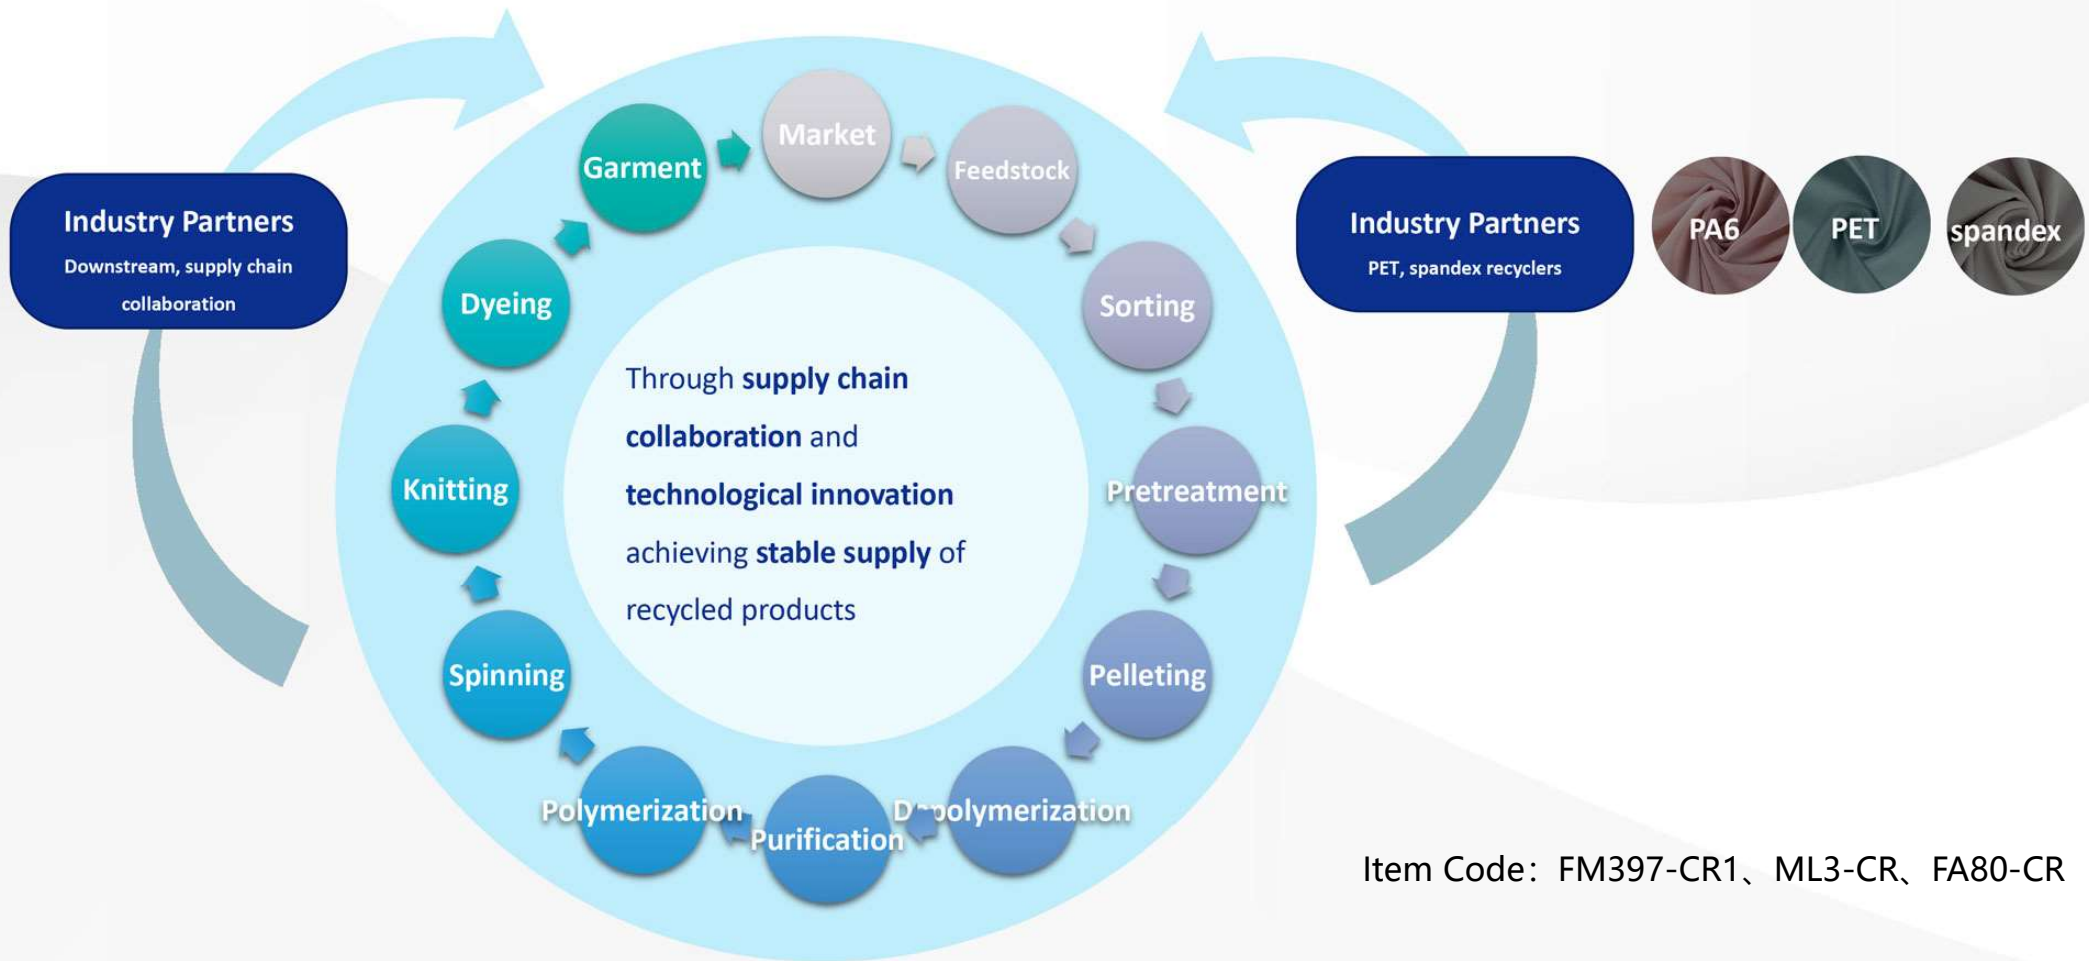

Circular Innovations for the Modern Explorer

Product of T2T

Fujian Suntion

Together with **industry partners** to establish
a circular ecosystem for **T2T recycling of fibers**

Item Code: FM397-CR1、ML3-CR、FA80-CR

A promotional image for Suntion's Talent Soft Series. It features three models standing in a snowy mountain landscape. The model on the left is a man in a grey puffer jacket and pants. The model in the center is a woman in a blue puffer jacket and pants. The model on the right is a woman in a white puffer jacket and pants. The background shows snow-capped mountains under a clear sky. In the top left corner, there is a logo consisting of three red diagonal bars followed by the text 'Talent Soft Series'. In the top right corner, there is a circular logo with the word 'SUNTION' and 'Fujian Suntion' below it.

Talent Soft Series

SUNTION
Fujian Suntion

**Is your winter collection truly cold-proof,
or does the fabric freeze before the
wearer does?**

Whisper Soft Down jacket

Fujian Suntion

*Seamlessly
transition from
urban commute
to leisure life*

Soft&Quiet

Fine dinier&High filament,more delicate, soft hand feel, and quiet.

High Filament

The 510T high-density weave has a single fiber fineness of only 0.44D

Dull&Wrinkle

The matte outlook and wrinkle texture create a more natural and soft look

Downproof

Without downbag can reach a nice downproofness

Item Code: FM349-R

/// Airy Ultra-light

Fujian Sunton

From City Streets to Nature's Trails

- Made from 7D ultra-fine N66 fiber, Only **22**g/m²
- Cold-resistant, Soft Hand feel
- Glossy & Texture

Item Code: MBHR13 (AW25 ISPO Outer Layer Best Product) 、 MBHR16

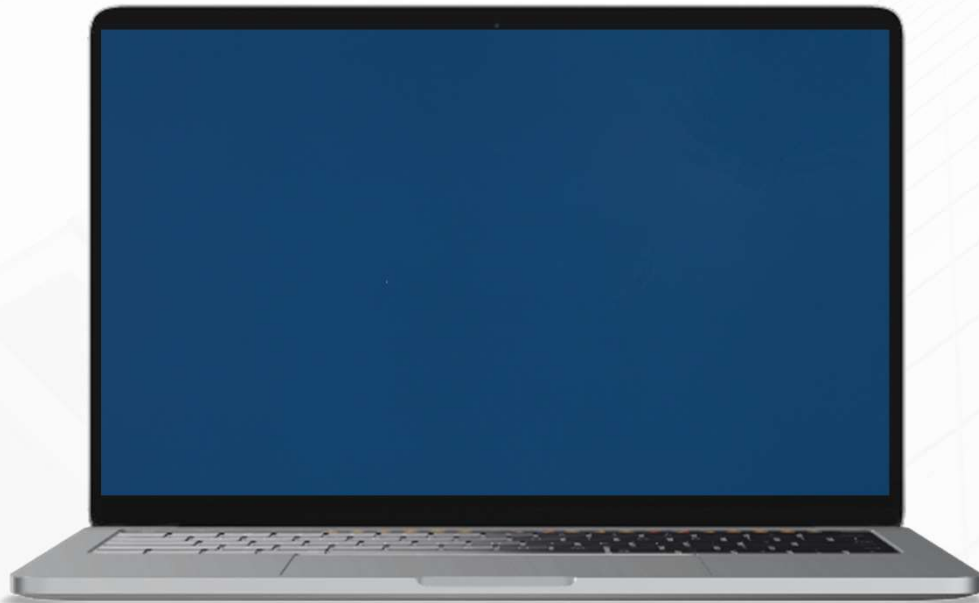

- ✓ *Urban Exploration & Beyond*
- ✓ *Your Everyday City Uniform*
- ✓ *The Ultimate Travel Companion*
- ✓ *Effortless Warmth Across the Seasons*

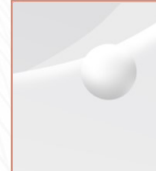

Talent N66

Fujian Suntion

Item Code: MHR35-R

Soft hand feel & Skin-friendly and comfortable

Lightweight and evenly wrinkled texture style

Cold-resistant and keep the soft hand feel even cold

Superior Mechanical N66

Fujian Suntion

Durable Stretch

High-performance elasticity that lasts

Cold-Resistant

Stays soft and supple down to -30°C

Ultra-Tough

Lightweight, abrasion-resistant, and anti-tear.

Item Code: MHR Y1、MHR Y15、MHR Y18

Purelume Breathable

Fujian Suntion

How does your down collection balance ultra-lightweight design with high-tenacity protection? can it break the 'sweat-freeze' cycle with true dynamic breathability?

/// Purelume Breathable

Fujian Suntion

Breathability

With a rating up to 30,000g/m²·24h (JIS L1099 B1-2021), it ensures rapid moisture wicking during high-intensity activity or daily wear

Downproof

Without the need for a down bag . It prevents clumping after long-term wear and ensures lasting thermal performance

Windproof

High-efficiency wind protection combined with resistance to light rain and splashes, making it easy to handle outdoor commutes.

Item Code: MR256-R

Dot Breathe

When running in high humidity and intense sun, can your apparel deliver UPF 50+ protection without sacrificing airflow?

Left:Regular Anti-UV fabric
Right:Dot Breathe fabric

Breathable

Boasting an airflow rate of $\geq 100\text{MM/S}$, keeping you cool as the fabric "breathes" with you

Unrestricted Movement

high-recovery 4-way stretch—engineered for comfort that never feels tight

UPF50+

Wash-durable sun protection that stays effective over time

Item Code: FMRL30-R、MRL28-R

Starpoint Non-sticky

Fujian Suntion

**Tired of sticky during summer peaks?
How can we help your runners stay
cool, dry, and unrestrained while
providing a total Anti-UV performance?**

Starpoint Non-sticky

Fujian Suntion

Beat the heat and humidity of summer performance. Our engineered back-side texture is the ultimate solution for sweat management and thermal relief, designed specifically for high-intensity outdoor activities

Sweat-wicking texture

The specialized back-side texture provides a dual effect of moisture dispersion and thermal insulation

3D Bubble Structure

Featuring a 3D crinkle or "bubble" texture, this lofted structure ensures the fabric remains non-sticky even during heavy sweating

Sweat-wicking texture:

Item Code: MHQY2-R

3D Bubble Structure:

Item Code: MR226-R

/// Drydot Non-sticky Dot Membrane

Fujian Suntion

***Bridge the gap
between City
Commuting and
Light Outdoor
adventure***

Item Code: FHR11+ PU Clear Dot Membrane

Weightless Performance

From 20D Recycled Nylon, this ultra-light shell weighs in at just 73g/m². It's the ultimate "zero-gravity" layer for your daily routine

The "Zero-Cling" Dot Tech

Our clear PU Dot Membrane is as stylish as it is functional. The textured dots prevent the fabric from sticking to your skin, providing a continuous "dry-touch" even during active exercise.

Versatile Protection

Seamlessly transition from city streets to nature. Enjoy reliable wind and light rain protection without compromising the breathability you need for all-day comfort.

Could the perfect fusion of natural wool and recycled nylon be the sustainable edge your next collection is missing?

Ecoshell Hybrid Performance

Fujian Suntion

Outerlayer: Recycled Performance Stretch

Powered by innovative chemical recycling, transforming discarded tires into high-quality nylon. It's performance that cleans up the world.

A high-performance composite mid-layer combining windproofing, and eco-friendly properties. Engineered for reliable protection across both high-intensity outdoor pursuits and urban commutes.

Item Code: FQAL6-R

Inner Layer: Non-Mulesed Wool

Utilizes premium, non-mulesed wool imported from Australia, ensuring ethical sourcing and natural biodegradability.

 Vigortech Bi-component

Fujian Suntion

A hiker wearing a light blue hooded rain jacket and a black backpack is standing on a mountain ridge, looking out over a valley. The background shows rolling hills and a clear sky.

**Why settle for sagging
and whitening?
Ready for a fabric with
permanent recovery and
rock-solid durability?**

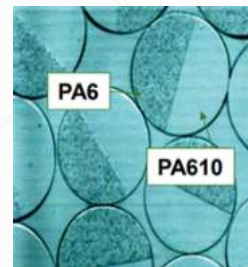

Mono-material Potential

1. The "Puffy" Touch
2. Smart Elasticity
3. Enduring Elasticity & Shape Retention
4. 20K/20K Performance

Elasticity Principle:

The inherent crimp and stretch of the fibers are achieved by leveraging the **differential thermal shrinkage** between the two polymer components (PA6 and PA610), creating a permanent mechanical memory.

Engineered with high-performance PA6/PA610 **bi-component** elastic yarns, this fabric offers exceptional stretch as a superior alternative to traditional Nylon/Spandex blends. The advanced 3-layer laminated construction provides elite waterproof and breathable performance in a single, integrated layer.

Fiber cross-section diagram

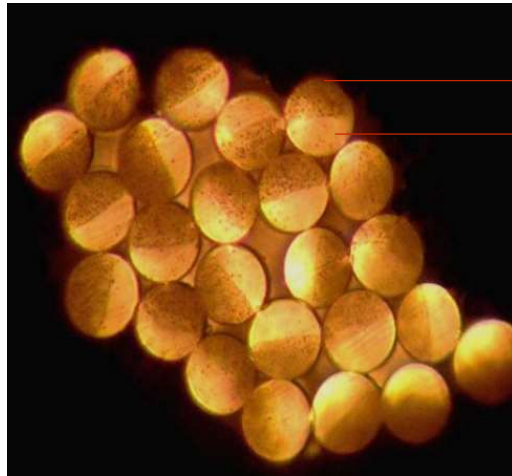

Natural crimped structure of the fiber

PA610 is derived from castor beans

Item Code: FE1 3 Layers

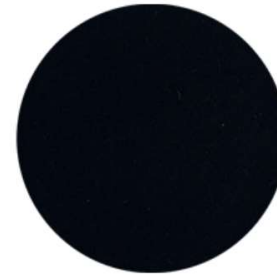

Vigortech Bi-component

PA6

PA610

10,000-Cycle Martindale Abrasion Test Comparison:

Nylon Bi-component
fabric

Polyester
Mechanical Stretch
(T800)

Engineered with PA6/PA56 bi-component yarns, this 100% Nylon solution offers superior abrasion resistance while effectively eliminating the "whitening" (frosting) issue common in Polyester T800 fabrics.

UltArmor Shield

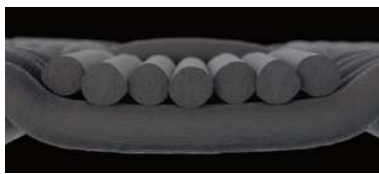

Fullon Sunton

Are you ready for a light-weight abrasion-resistant shell that survives heavy-load friction without pilling or tearing?

Diamond-Section High-Tenacity Series

Our unique Diamond-Section fibers don't just sit together—they **Interlock**. This geometric breakthrough creates a fabric that is significantly tougher, more tear-resistant, and more compact than traditional circular yarns.

Circular fiber cross section

Diamond-Section cross section

Item Code: MR237-R

← Tearing strength of 40N

← 20K/20K Performance

← Extreme Abrasion Resistance
300,000 Martindale cycles
